

IN THE CLAIMS

Please amend Claims 6 and 8 as follows:

-- 6. (Amended) A stable and high-solids aqueous dispersion containing auxiliary solvent, which comprises:

*b3*  
a disperse phase of a polyisocyanate mixture comprising (a) from 20-70% by weight of a blocked, hydrophilically modified polyisocyanate (A) and (b) from 30-80% by weight of a blocked, hydrophobic polyisocyanate (B) in an auxiliary solvent (G), the product aqueous dispersion having a solids content ranging from 35-80 % by weight.

8. (Amended) A stable and high-solids aqueous dispersion which is virtually free from auxiliary solvent, which comprises:

*b4*  
a disperse phase of a polyisocyanate mixture comprising (a) from 20-70% by weight of a blocked, hydrophilically modified polyisocyanate (A) and (b) from 30-80% by weight of a blocked, hydrophobic polyisocyanate (B), having a solids content ranging from 40-60 % by weight and a content of auxiliary solvent (G) of <2 % by weight. --

Please add new Claim 21 as follows:

--21. (Newly Added) A stable and high-solids aqueous dispersions containing auxiliary solvent, which comprises:

*b5*  
a disperse phase of a polyisocyanate mixture comprising (a) from 20-70% by weight of a blocked, hydrophilically modified polyisocyanate (A) and (b) from 30-80% by weight of a blocked, hydrophobic polyisocyanate (B) in an auxiliary solvent (G), the product aqueous dispersion having a solids content ranging from 35-80. % by weight in which the blocked, hydrophilically modified polyisocyanate (A) facilitates the dispersion of blocked, hydrophobic polyisocyanate (B) in the product aqueous dispersion. --
